

Professional Jukeboxes

The jukebox that started a revolution.

Music Center Jukeboxes

Get more from your valued music collection than you ever dreamed possible!

The Music Center is the next generation in luxury music systems for the home. It is a full-service music management system that allows you to load, organize, and play your CD music collection with a touch of your finger.

Drag and drop an album or any song with a single finger's touch

The Ultimate Home for your Music Library

- 160 GB of storage accommodates up to 2800 CDs, or the equivalent to 40,000 songs, depending on compression preference.
- Automatically acquires album data from the AMG Network - including cover art, track details, even album reviews.
- Supports music import from USB devices.
- Supports a variety of quality compression options, including near-CD quality compression (WMA formats).
- Music Center is always current - updates and new features are added during the maintenance cycle - at no additional charge!

Get More Pleasure from your Music Collection

- The stored CD information becomes the on-screen catalog - browse your music collection by Artist, Album, Genre, and more!
- Double tap any song for a 7 second audio preview.
- To play a track, touch a song title and drag it to the playlist.
- Move any song to the top of the playlist.
- Create and store multiple playlists with a theme - play the entire album or just a tune.
- Build custom playlists manually and save them for future enjoyment or sync with MP3 player.
- Let the Music Center create playlists automatically from your library based on Theme, Tone, Style, or Era, using the built-in Tapestry™ interface.

Quality Audio Features

- Two-Zone volume control allows you to customize your Music Center system with external speakers.
- 5-Band graphic equalizer has on-screen control and ensures peak settings to suit your tastes.
- The user-managed SoftFade™ engine delivers incredibly smooth cross-fade and soft volume transitions in multiple modes.
- Password protection options control access to volume, settings and playlists.

Share your Library

- Take your music with you; the Music Center syncs playlists to your MP3 device and rips custom CDs.
- Audio Output connectors allow you to play your MP3 device through the Music Center system.
- Add the Music Center to your home PC network for even more music using file sharing features.
- Customize the Screen Saver with your photos and artwork!

QB8 Bubbler

Just Press Play

The QB Series Music Center Jukeboxes are also available in other popular “nostalgic” cabinet styles.

QB4 Gazelle

Bold graphics and colorful accents define the Gazelle Music Center. Graceful beasts and horned gazelles appear to leap with joy on etched and illuminated glass panels that accent the center grille. Custom printed arch panels and molded wood crown and shoulders complete the slightly sassy Art Deco-inspired cabinet.

QB4 Harley Davidson®

Made exclusively by Rock-Ola for the Harley Davidson brand. Based on the design of the iconic “Bubbler” cabinet, the Harley Davidson Music Center features additional screen-printed glass panels and custom arch panels that illuminate the door. Carved wood shoulders and molded eagle crown complete the Harley Davidson theme.

QB6 Peacock

Many collectors consider the Peacock the most elegant of the Bubbler series. The Peacock Music Center features a sparkling and colorful illuminated cabinet panel flanked by two additional bubble tubes in the lotus motif grille. The exclusive polarized light centerpiece moves mechanically to wash the Peacock design with a spectrum of brilliant color. Custom printed arch panels with molded wood crown and shoulders create an exotic and luxurious allure.

Mystic Wall Mount

Great “Style and Space” alternative to the full-sized Music Center, the Mystic offers the same revolutionary touchscreen control in a spiffy, wall-mounting metal cabinet. The Mystic is a compact and modern Music Center, illuminated with a simple halo of blue light. Its versatile design compliments many of today’s modern interiors just as the “Auto Magic Touchscreen” technology compliments today’s music technology. With the same CD storage capacity and features as the full size Music Center - including amplifier and built-in speakers - the Mystic measures 26” x 19” x 7” deep and may be hung with a standard TV mount or can reside on the countertop with two feet.

The “Q” Table Top Model

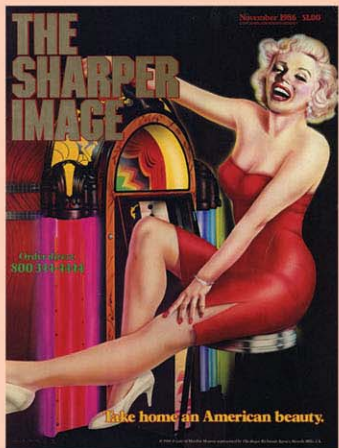

Rare wood, die-cast and chrome-plated accents, pilasters illuminated by moving, changing colors, and the “Auto Magic Touchscreen” distinguish this stylish and feature-loaded jukebox from the rest of the pack. Petite and powerful, measuring just 26” x 22” x 11” deep, the “Q” Table Top Model is built with the same meticulous attention to detail that the Rock-Ola Nostalgics have made famous. The “Q” has a built-in amplifier and speakers and the Qsonix-powered interface allows storage and total music library management of up to 2,800 CDs.

Specifications

- 19” ELO Touchscreen Monitor
15” (Q table top)

26”W x 7”D x 19”H (Mystic)
22”W x 11”D x 26”H (Q)
- Weight:
300 lbs. approx. (floor models)
70 lbs. approx. (Mystic & Q models)
- Approved RoHS  

Music Center Jukeboxes

In 1942 the American public was astonished by the creation of a revolutionary new jukebox. As the music played, bubbles streamed up the side pilasters and motor-driven color cylinders bathed the box in ever-changing colors: red, green, yellow, and purple.

But it was wartime, and production soon ceased. As a result, this is one of the most sought-after jukeboxes for collectors today.

Forty years later - A classic is reborn.

For over a decade antique-restorer Glenn Streeter has kept these classic legends alive. After years spent crafting replacement parts for old jukeboxes, Streeter turns his knowledge and perfectionism to creating this full-size replica.

The original was equipped with a 78 RPM phonograph, played 24 songs, and have sold for over \$40,000. The new jukebox has a computerized music system, with room for 100 CDs, playing thousands of songs, yet this handcrafted beauty is a fraction of the cost.

The Sharper Image catalog, November 1986

CD Wallettes

This Retro diner-style beauty will play all your favorite tunes from any room in the house through its own stereo speakers and your Rock-Ola jukebox. Chrome plated solid die-cast housing with illuminated pilasters.

Harley Davidson® Wallette

CD Nostalgic Jukeboxes

CD8 Bubbler

The most popular jukebox of all times has been meticulously reproduced in Rock-Ola's Series V Bubbler. The bubbles of air perk merrily to the top of the 8- bubble tubes, while a kaleidoscope of colors flows through the translucent plastics. It's the 50's all over again when the changer flips the CD right down in front of you. All 19 trim pieces are genuine die cast metal, triple plated with copper, nickel, and polished chrome.

With quality in mind, only the finest hardwoods adorn this beauty. The hand-crafted quality of these classics is a tradition Rock-Ola proudly continues.

Black CD8 Bubbler

CD4 Gazelle

Rock-Ola's recreation of a collector's dream. The rarest of jukebox wonders was the elegant wartime machine, of which only a few hundred were made. The Gazelle features art deco mermaids blowing trumpets above two leaping gazelles etched in mirrored glass panels below. The Gazelles are brilliantly illuminated with ever-changing colors. The front door is finished in buried elm and African satinwood. All the craftsmanship of a classic in a professional jukebox.

Rock-Ola has achieved the nearly impossible by creating this series of classic jukeboxes utilizing the most sophisticated technology available today. With SyberSonic® electronics inside, your jukebox will exceed your expectations.

CD6 Harley Davidson®

The Rock-Ola American Legend jukebox, licensed by the Harley Davidson Company, is popular world wide. The American Eagle sets the theme for this icon Nostalgic jukebox featuring illuminated custom screened glass panels, arch lighting and pilasters. Intricate, expertly finished woodwork and molded accents at the shoulder and crown distinguish the Harley Davidson Nostalgic from the “rest of the pack”.

CD6 Peacock

The Peacock is Rock-Ola’s top of the line jukebox and includes all the classic features. Six bubble tubes, rotating colors in the side column, and the incredible “polarization of light” in which every feather in the Peacock plumes changes color independently from the feather next to it. The beauty of the Peacock is equalled only by the quality of its sound. This bird will sing all of your favorite songs with its Four Channel stereo sound system.
